

Kenza EL BAZ

AI & DATA SCIENCE ENGINEERING STUDENT

Final-year AI & Data Science engineering student who takes machine learning from notebook to production. Combines deep learning and data analysis (TensorFlow/Keras, Scikit-learn, Pandas) with proven full-stack experience: built a natural-language analytics assistant, delivered an enterprise Angular/.NET application in 8 weeks, and cut SQL response times by 30%. Seeking a 4–6 month PFE internship (February – August 2027).

EDUCATION

EMSI – ÉCOLE MAROCAINE DES SCIENCES DE L'INGÉNIEUR

Engineering Degree in Computer Science – Artificial Intelligence & Data Science (5th year)

2022–2027 · Rabat, Morocco

LYCÉE SCIENTIFIQUE HASSAN

Baccalaureate in Life and Earth Sciences (SVT)

2019–2022

CERTIFICATIONS

Oracle Autonomous AI Database Certified Professional

Coursera

- IBM Python for Data Science & AI
- UCSD Big Data
- HKUST Software Engineering
- Johns Hopkins Unix/Linux
- Google Agile PM

LANGUAGES

French: Fluent

English: C2

Arabic: Native

INVOLVEMENT

EMSI Student Ambassador

Media Manager, EMSI Student Union (BDE)

PROJECTS

BRAIN TUMOR CLASSIFICATION FROM MRI

END-TO-END ML PIPELINE – Python, PyTorch, Scikit-learn, FastAPI, Docker

- Audited 5,864 MRI scans (duplicates, train/test leakage) and built reproducible group-based splits
- EfficientNet-Bo (PyTorch): 0.9746 macro-F1 and 97.84% test accuracy
- Evaluation: confusion matrix, error analysis and Grad-CAM explainability
- Served the model through a FastAPI inference API, with a Docker deployment setup

KNOWLEDGE-BASED AGENT – WUMPUS WORLD

Propositional logic, knowledge representation

- Implemented a logic-based agent that reasons over a knowledge base to plan safe, goal-oriented exploration

EXPLORATORY DATA ANALYSIS PIPELINE

Python, Pandas, NumPy, Matplotlib, Seaborn

- Cleaned large datasets (imputation, feature engineering) and ran statistical EDA with distribution and correlation plots

EXPERIENCE

TORCK (FORMERLY HAHN SOFTWARE) · Rabat, Morocco

SOFTWARE ENGINEERING INTERNSHIP (RETURNING)

July 2026 – Sept. 2026

- Developed Ask ATS, a natural-language analytics assistant that answers users' questions in plain language
- Implemented multi-turn conversational context so follow-up questions build on earlier ones

TORCK (FORMERLY HAHN SOFTWARE) · Rabat, Morocco

PFA INTERNSHIP – FULL-STACK DEVELOPMENT

July 2025 – August 2025

- Designed and built a secure RESTful API in .NET 7 with JWT authentication, covering 12+ endpoints
- Optimized SQL queries on the relational database, cutting response times by 30%
- Delivered the Angular/.NET enterprise application in 8 weeks in an Agile team of 4, with unit tests, code reviews and deployment to staging

ANCFCC – NATIONAL LAND REGISTRY AGENCY · Rabat, Morocco

INTERNSHIP – SYSTEMS & DATABASES

July 2023

- Analyzed Oracle cadastral databases (several million land records) and contributed to a security audit of citizen-data procedures

TECHNICAL SKILLS

- **ML & AI:** PyTorch, EfficientNet, CNNs, computer vision, Scikit-learn, evaluation (macro-F1, confusion matrix, error analysis), Grad-CAM, TensorFlow, Keras
- **Data:** Python, Pandas, NumPy, data preprocessing, dataset auditing, feature engineering, EDA, Matplotlib, Seaborn
- **Deployment & backend:** FastAPI, Docker, REST APIs, JWT, .NET 7, Django, Node.js
- **Databases:** SQL, query optimization, relational database design, PostgreSQL, MySQL, Oracle
- **Tools & languages:** Git, Linux, unit testing, Agile / Scrum, C/C++, JavaScript, TypeScript, Angular, React
