

Kenza El Baz

Rabat, Morocco | +212 652 84 11 26 | kenza0652@gmail.com | linkedin.com/in/kenza-el-baz | github.com/kenza-elbaz

SUMMARY

Final-year **AI & Data Science engineer** who takes machine learning from notebook to production. Pairs deep learning and data analysis (**TensorFlow/Keras, Scikit-learn, Pandas**) with proven **full-stack delivery**: built an NL analytics assistant, shipped an enterprise Angular/.NET app in 8 weeks, and **cut SQL response times by 30%**. **Seeking a 4–6 month PFE internship (Feb – Aug 2027)**.

EXPERIENCE

Software Engineering Intern (Returning Intern) Jul. 2026 – Aug. 2026

Torck (formerly Hahn Software) *Rabat, Morocco*

- Built **Ask ATS**, a natural-language analytics assistant that answers user questions in plain language
- Implemented multi-turn conversational context so follow-up questions build on earlier ones

Full-Stack Developer Intern (PFA) Jul. 2025 – Aug. 2025

Torck (formerly Hahn Software) *Rabat, Morocco*

- Delivered an enterprise web application in **Angular 16** and **.NET 7** within 8 weeks, in an Agile team of 4 developers with weekly sprints and peer code reviews
- Designed and implemented a secure **RESTful API with JWT authentication** covering 12+ endpoints
- Optimized SQL queries against the relational database, **reducing response times by 30%**
- Modelled and integrated the relational database, wrote unit tests, and deployed the application to staging

Systems & Database Intern Jul. 2023

ANCFCC – National Land Registry Agency *Rabat, Morocco*

- Analyzed **Oracle** cadastral databases holding several million land records
- Contributed to a security audit of procedures protecting citizen data; authored a best-practices report

PROJECTS

Brain Tumor Classification (CNN) | *Python, TensorFlow, Keras*

- Trained a CNN (convolutional, pooling and dense layers) to classify brain tumors from a Kaggle MRI dataset
- Built the preprocessing pipeline and evaluated accuracy, loss and confusion matrix; curbed overfitting

Exploratory Data Analysis Pipeline | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- Cleaned large datasets (imputation, feature engineering); ran statistical EDA with distribution/correlation plots

Knowledge-Based Agent – Wumpus World | *Propositional Logic, Knowledge Representation*

- Implemented a logic-based agent that infers over a knowledge base to plan safe, goal-oriented exploration

Web Applications | *Laravel, MySQL, React, TypeScript, Django*

- Recipe platform (role-based auth, CRUD), real-time weather dashboard SPA, sports club management app

TECHNICAL SKILLS

Machine Learning & AI: Deep Learning, CNNs, TensorFlow, Keras, Scikit-learn, Computer Vision, Model Eval.

Data: Python, Pandas, NumPy, EDA, Feature Engineering, Data Preprocessing, Matplotlib, Seaborn

Databases: SQL, Query Optimization, Relational Database Design, Oracle, MySQL, PostgreSQL

Software Engineering: REST APIs, JWT, .NET 7, Angular 16, React, TypeScript, Django, Laravel, Node.js

Languages & Tools: C/C++, JavaScript, Git, Linux, Unit Testing, Agile / Scrum

EDUCATION

EMSI – École Marocaine des Sciences de l'Ingénieur Rabat, Morocco

Engineering Degree in Computer Science – Artificial Intelligence & Data Science (5th year)

2022 – 2027

CERTIFICATIONS, LANGUAGES & LEADERSHIP

Certifications (Coursera) IBM Python for Data Science & AI, UCSD Big Data, EPFL OOP in C++, HKUST Software Engineering, Google Agile PM, Meta React, Johns Hopkins Unix/Linux

Languages: Arabic (native), French (C2), English (C2)

Leadership: EMSI Student Ambassador; Media Manager, BDE EMSI student union
